

**Efficient solutions for
warehouse logistics
and archive systems**

Efficiency in all we do - as standard

As a company operating across Europe with extensive expertise and many years' experience, we support our customers with highly efficient solutions for warehouse logistics and the archiving of paper-based documents.

Having no links to any manufacturer allows us to design the perfect customised solution chosen from a wide range of providers. We focus not on the limit of what is technically possible but on what makes most sense for our customers.

Whether the work involves a selective modernisation, a complex project as general contractor or a comprehensive service package, we deliver reliable, cost-effective solutions as standard - solutions that are as unique as our customers' requirements.

Our services are built on flexibility

- ❖ Advice not influenced by any manufacturer
- ❖ Planning and personalised design
- ❖ Redesigns
- ❖ Expansion of existing systems
- ❖ Sale or brokering of warehouse and archive components
- ❖ Software implementation
- ❖ Assembly and commissioning
- ❖ Disassembly and disposal
- ❖ Relocation service, including commissioning
- ❖ Safety checks in line with relevant standards
- ❖ Repairs and maintenance
- ❖ Round-the-clock service

Customised storage and archiving systems

Save space by optimising use of your available area and save time by speeding up your access to stored items or archived documents. Fine-tuning workflows and existing space opens up commercial potential that can be exploited day in, day out.

Our skill in expanding existing systems and connecting different storage systems using centralised management software makes us a safe pair of hands for any modernisation project.

We can also incorporate second-hand as-new office and storage systems from reputable manufacturers (subject to availability) into our designs, giving our customers an extra opportunity for optional cost savings.

The right space- and time-saving solution for every requirement.

System solutions

- ❖ Lift systems
- ❖ Vertical carousels
- ❖ Mobile pallet rack systems (manual/electric)
- ❖ Shelving racks
- ❖ Pallet racks
- ❖ Cantilever racks

Areas of application

- ❖ Production facilities
- ❖ Workshops
- ❖ Logistics firms
- ❖ Document archives (e. g. banks, insurers, local government offices)

We support our customers in all we do

Assembly and commissioning

Our highly qualified staff work flexibly and reliably, including outside standard business hours, so as not to impact on our customers' operating processes.

Disassembly including disposal

We can disassemble shelf storage systems, winding machines, etc. and dispose of them if required.

Relocation service

If you are relocating, we will remove existing storage systems, disassemble them and, if required, handle transport as well. We will then reassemble the storage systems at their new location and put them back into operation.

Repairs

Experienced staff will repair your systems with all the necessary expertise.

Safety checks

With no links to any one manufacturer, we can provide statutory checks of stationary and portable equipment and operating resources at regular intervals, including in accordance with the following standards:

Current standard	Formerly
DGUV Regulation 1	BGV A1
DGUV Regulation 3	BGV A3
DGUV Regulation 68	BGV D27
DGUV Rule 108-007	BGR 234
*Shelf inspection in accordance with DIN EN 15635	
DGUV Principle 312-906	ZH 1/55 (BGG 906)

*Current standard that will also continue to apply in the future

Maintenance

To keep their equipment in good working order and prevent faults, we offer our customers individual maintenance agreements that ensure their system retains its value through regular maintenance.

Service

We provide our customers with reassurance even in the event of a breakdown. Our optional round-the-clock service delivers the best possible support.

Talk to us.

**We open up a new
dimension in efficiency.**
